

@ [NishaKushwah2004 \(Nisha Kushwah\)](#)

/ [nisha-kushwah](#)

Technical Skills

Programming Languages: C(basic), C++, Java, Python

Web Development: HTML, CSS, JavaScript, React, Node.js, Express.js, Spring Boot, REST APIs, TailwindCss

Tools & Platforms: Git, GitHub, VS Code, ChatGPT, Postman, Coppeliasim, Vercel, Render, postman, Google Generative AI APIs, OpenAI APIs, Prompt Engineering, Jupyter, Kaggle, Colab, cisco packet tracer, OpenCV, Cursor, AntigraVity, Claud

Databases: MongoDB, SQL

AI/ML: Scikit-learn, TensorFlow (Basic), NumPy, Pandas, Matplotlib, Jupyter Notebook, Anaconda Machine Learning, Deep Learning (DNN basics), Model Evaluation, Data Preprocessing, feature engineering

Experience

1) Full Stack Development Intern | Cognifyz Technologies (Remote) [github](#) 5 Oct – 5 Nov 2025

- **Developed scalable full-stack web applications** using modular MVC architecture, implementing RESTful APIs, external API integrations, and optimized database operations.
- Implemented **secure authentication and application security** using JWT and OAuth 2.0, including password hashing, input validation, rate limiting, and centralized error handling.
- Built **responsive, mobile-first user interfaces** and improved performance through caching strategies, efficient data handling, and background job processing.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js (MERN), JWT, OAuth 2.0, Bootstrap, REST APIs, Git

Projects

1) AccessWAI – AI based Web Accessibility Analysis Platform | Full Stack Project (LIVE)

- Live Demo : [AccessiWAI](#) | Github : [NishaKushwah2004/AccessWAI](#).
- Developed a **full-stack web accessibility analysis platform** that processes uploaded ZIP codebases and detects WCAG compliance issues across JavaScript, JSX, HTML, CSS, TypeScript, and TSX, reducing accessibility-related technical debt.
- Engineered an **automated analysis and reporting system** with intelligent issue detection, severity classification (critical, medium, low), and secure JWT-based authentication using bcrypt password hashing and role-based access control.
- **Tech Stack:** React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB (Mongoose), JWT, bcryptjs, Multer, ADM-ZIP, Google Generative AI, REST APIs, ESLint, PostCSS, Git

2) XML Metadata Editor | Full Stack Project

- Live Demo : [XMLMeta Studio](#) | Github : [NishaKushwah2004/XMLMetaStudio](#)
- Developed a **web-based XML metadata management tool** that enables users to edit, validate, search, and export XML metadata through an intuitive interface without requiring direct knowledge of XML syntax.

- Implemented **real-time editing and structural validation**, ensuring data integrity while improving efficiency in metadata management and integration with external systems.
- **Tech Stack:** React, Vite, JavaScript, Node.js, Express.js, REST API

Education

1. Bachelor of Technology in Computer Science and Engineering

Jabalpur Engineering College, Jabalpur

Expected Graduation: June 2027 | CGPA: 8.26

2. School:

- Jawahar Navodaya Vidyalaya |Senior Secondary | CBSE | 94.8% | 2021
- Jawahar Navodaya Vidyalaya |Higher secondary | CBSE | 95.6%| 2019

Certifications

1. Introduction to Data Science – 2025
2. iOS Development for Beginners: Master Swift & App Building – 2025
3. CyberOps Associate - 20 Feb 2026
4. Software Engineering Job Simulation – JPMorgan Chase & Co., 2025

ACHIEVEMENTS / HOBBIES

- Top 5 Finalist – SIH Internal Hackathon 2025, Jabalpur Engineering College
- Participant – Hackcrux 2025, LNMIIT Jaipur
- NCC Gold Medalist – Judging Distance & Field Signals, All India Thal Sainik Camp 2024

POSITION OF RESPONSIBILITY

➤ Under Officer (UO) – National Cadet Corps (NCC)

Jabalpur Engineering College

- Led and coordinated platoon-level operations and training, driving discipline, execution consistency, and accountability across cadets while meeting organizational standards.
- Served as a key liaison between commanding officers and cadets, enabling clear communication, rapid issue resolution, and effective team alignment under time-critical conditions.
