Summary

Computer Science Student • Software Engineer • AI/ML Enthusiast • Full Stack Developer I'm a passionate Computer Science Engineering student, Full-Stack Developer, and aspiring AI Engineer who enjoys building intelligent, scalable, and user-focused digital solutions. My interests span Web Development, Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and Agentic AI.

Technical Skills

Programming Languages: C(basic), C++, Java, Python

Web Development: HTML, CSS, JavaScript, React, Node.js, Express.js, REST APIs, TailwindCss

Tools & Platforms: Git, GitHub, VS Code, ChatGPT, Postman, Vercel, Render, Google Generative AI APIs, OpenAI APIs, Prompt Engineering, Jupyter, Kaggle, Colab, Cloud, Antigravity, Cursor, Anaconda

Databases: MongoDB, SQL, Postgre

AI/ML: Scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib, ML Models, Deep Learning, Model Evaluation, Data Preprocessing, Data Visualization, LangGraph, Langchain, Agentic AI, AI Agents, Genrative AI, LLMs, RAG

Experience

1) AI/ML Intern | Infosys Springboard (virtual internship)

22 June 2026 - Present

Currently developing an AI-powered platform to identify optimal locations for solar and wind energy deployment by analyzing environmental, geographical, and climate datasets. Leveraging machine learning techniques to support data-driven decision-making for sustainable renewable energy planning.

Tech Stack: React, JavaScript, Python, FastAPI, PostgreSQL+PostGIS,

2) Full Stack Development Intern | Cognifyz Technologies (Remote) [github](#)

5 Oct – 5 Nov 2025

As a Full Stack Development Intern at Cognifyz Technologies (Internship, 2025-2025), I gained hands-on experience in the software development lifecycle. My role involved contributing to the development of web applications, utilizing both front-end and back-end technologies. I developed my skills in coding, debugging, and testing, contributing to team projects and learning industry best practices.

Tech Stack: MongoDB, Express.js, React.js, Node.js (MERN), JWT, OAuth 2.0, Bootstrap, REST APIs, Git

Projects

1) Movie Recommendation System ([live](#)) ([github](#))

Developed a machine learning-based movie recommendation platform that combines TF-IDF content similarity with live movie data from TMDB. Users can search movies, explore detailed information, browse trending titles, and receive personalized recommendations through an interactive Streamlit interface powered by FastAPI.

2) Blog Writing Agent ([live](#)) ([github](#))

Blog writing agent built with LangGraph and Streamlit that generates structured, research-backed technical blogs using Groq LLMs, Tavily search, and Gemini-generated diagrams. It automates planning, content generation, evidence collection, and image creation in a single workflow.

3) Github Card Generator ([live](#)) ([github](#))

A full-stack AI-powered web application that generates beautiful, personalized developer cards from any public GitHub profile. Built with Google ADK (Agent Development Kit), FastAPI, and a clean dark-mode frontend.

Enter any GitHub username and the app will:

- Fetch the user's public GitHub profile and repository data
- Analyze their top languages, projects, and activity using an AI agent
- Generate a stylized HTML "dev card" with a personalized vibe, top skills, and fun fact
- Serve the card for download or sharing

4) AccessWAI – AI based Web Accessibility Analysis Platform ([live](#)) ([github](#))

AccessAI is a web accessibility checker designed to ensure that web applications built with JavaScript, JSX, HTML, CSS, TypeScript, and TSX comply with the latest industry standards for accessibility. This tool helps developers identify and fix accessibility issues in their web applications, making them more inclusive for all users.

Education

Bachelor of Technology in Computer Science and Engineering

Jabalpur Engineering College, Jabalpur

Expected Graduation: June 2027 | CGPA: 8.26

Certifications

1. AI Tools Workshop – be10x – Ine 2026
2. 60 days POTD Challenge – GeeksforGeeks – May 2026
3. Introduction to Data Science – Infosys Springboard - 2025
4. Software Engineering Job Simulation – JPMorgan Chase & Co., 2025
5. CyberOps Associate – 20 Feb 2026

ACHIEVEMENTS / HOBBIES

1. Top 5 Finalist – SIH Internal Hackathon 2025, Jabalpur Engineering College
2. Participant – Hackcrux 2025, LNMIIT Jaipur
3. NCC Gold Medalist – Judging Distance & Field Signals, All India Thal Sainik Camp 2024

RESPONSIBILITY

1. AI/ML Intern | Infosys Springboard
2. Under Officer(UO) | National Cadet Corps(NCC) | JEC
3. Full Stack Development Intern | Cognifyz Technologies
